

Sihirli Bahçe Montessori School

Dear Parents;

Sihirli Bahçe Montessori School has been teaching different art branches in Art Class. This year we'll make it different and we will teach one different classical music artist every month to our children and they will listen their music. First, we want to talk you about classical music and the benefits of classical music.

Researches shows, especially in the first years of child development, music is a really important factor. 85% of mental development finishes until 8 years old, 80% of brain development finishes until 6 years old. After nutrition and education, the most important factor for intelligence and brain development is music.

• There are a lot of researches about the effect of classical music on people. As a result of one research in this topic, major tunes make people happy and minor tunes make people sad. These researches about classical music usually done on children and babies, and as the result of it, they realized listening classical music effected babies in their mother's womb in all kind of ways, accelerate the growing of babies and the children. If we want to say the benefits of listening classical music;

Music is a fact which makes people happy, peaceful, creative, hopeful, excited, strong, believer and brave. We know it helps our mind and our creativity and it helps growing of body like it helps to plants. And this calls "Mozart Effect".

If we specify the benefits of music:

- It has positive effect on babies with their intelligence and accumulate the development of babies.
- It helps people to rest, to relax.
- If you choose the right rhythms, classical music has an motivational affect white studying. It enlarge the capacity of learning
- Classical music can create happiness on psychology and the people who listen classical music feel better.
- The children who listen classical music will expose positive behavior.
- Classic music has a healing role on negative psychological situations like depression and helps to reduce the stress.
- People who listen classical music regularly has better motivation and attention span.

This month, we will teach our children Wolfgang Amadeus Mozart,, who is one of the best composers in the world. We will make them listen Mozart's songs while we're welcoming you in the morning, in Montessori sessions and the whole day time while the kids are in school.

Mozart was born in 27th January 1756 in Salzburg, Austria. Mozart started to play piano at 3 years old, just by his skills and started to compose songs at 5 years old. With his fathers support, he joined long tours and even he is young, he became an artist that whole country know about. In this tours, he was always successful and also because of his superior intelligence, he started to learn the country's language wherever he go and he learned a lot of languages.

Mozart has dies while he was 35. He wanted to catch the perfection in his work and he made it, that's why any of his compositions are not alike. In his work, he showed that he can make mind an feelings dance with harmony. He made a successful start to romantic cult in music and by childish cuteness that he add to his compositions, he made his compositions universal.
